Getting Started

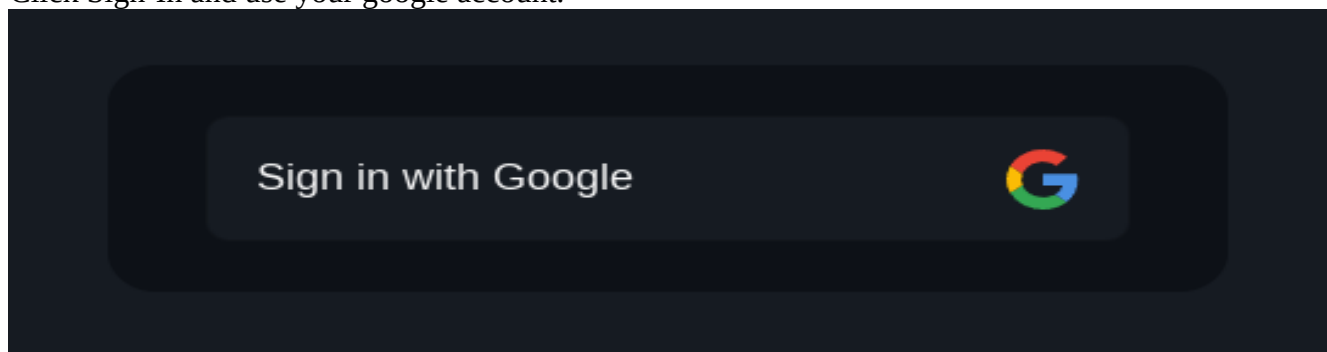

VA Springboard application enables you to manage the operational complexities of running a school and regular reporting on activities to stakeholders. This will help in increasing efficiency in terms of reduced communication overhead and increased transparency since data is always available in real time. The application is targeted primarily to staff members of Vision Aid and partner school. To use the application you would need a working google account. Provisioning of access is discussed later in the document.

Login

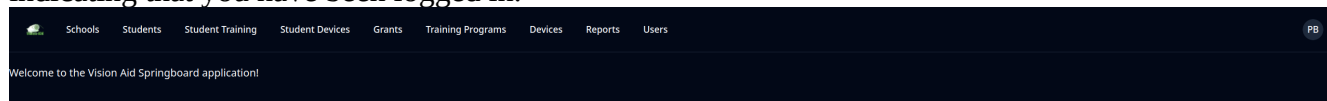

Use the web browser to navigate to the URL of the VA-Springboard application

Click Sign-In and use your google account.

You should see the following screen with navigation bar. Your initials appear on the right of you screen, indicating that you have been logged in.

On-boarding Schools

To view existing on-boarded schools click on the “School” link in the navigation bar.

Register School

Adding School Staff

Once the school is registered/ on-boarded in the system you would need to provision access to school staff members to access the system. To provision access you will need the name and google email addresses of the school personnel. Click on the “Users” link and then click “Add User”

Next, fill in the Name and email(google) of the user and assign an access Role (Admin/ Staff) and select the school. Click “Add User” to finish registration.

Add New User

Name

Test User

Role

STAFF

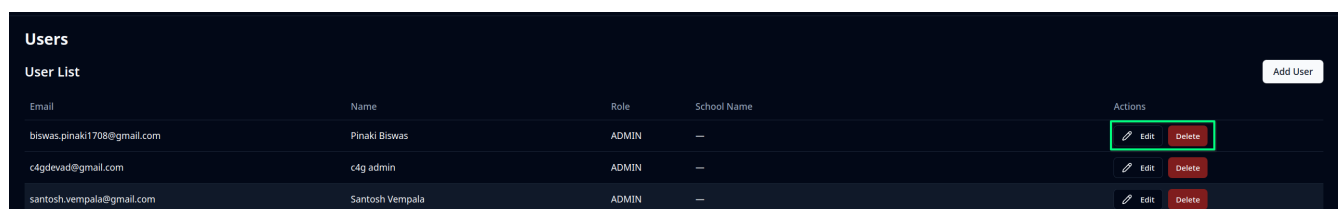

School

NBFM Jagriti School, Pune

Add User

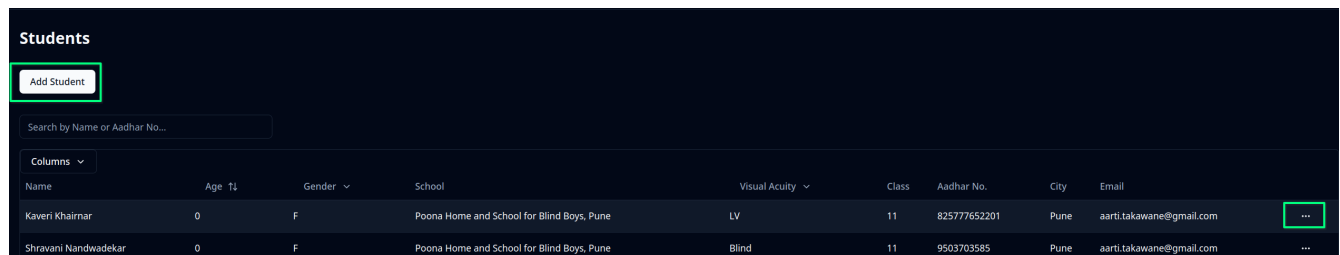

Users can either be “Admin” or “Staff”. Admins can view and change all aspects of the system including adding and removing users. Admin role should be reserved only for Vision Aid Staff who require super user access to the system. Staff role is tagged to a specific school. Staff can only view and edit details of the schools that they are tagged to.

You can also change or delete the existing user details and roles by clicking the “Edit” or “Delete” button at the end of the user list row on the right.

Enrolling Students

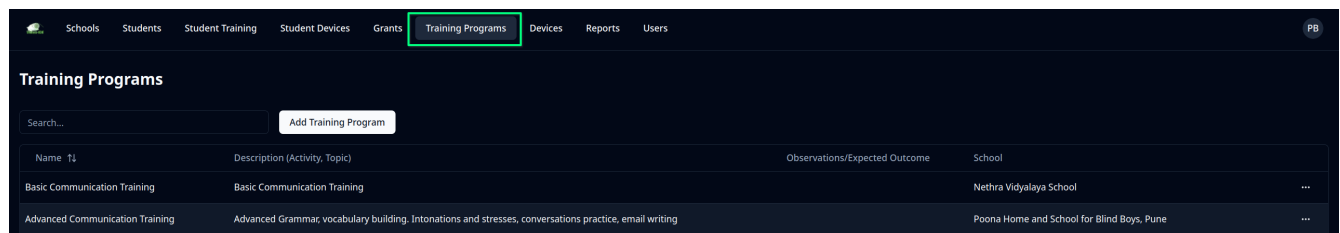

Typically school staff are responsible for enrolling students for their own school. Login as the staff member of the school you want to enroll students in and click on “Students” in the navigation bar. You should see a list of currently enrolled students in the school. To add a new student, click on the “Add Student” link. Fill in the student details and click “Add Student”. To view or change the details of an existing student, click on the three dot menu at the end of the student list row and then click on “View” or “Edit”.

Generating Reports

Admin users of Springboard application can generate reports for any school on-boarded in the system. To generate a report click on the “Reports” button. This will display the report data for all schools for the current quarter by default. To filter the data, you may choose a different quarter, a specific school from the drop down or even a custom date range. All the available data is displayed in a tabbed format which can be navigated by clicking on the tabs from “Grant Report” to “Case Stories”. The entire dataset can be exported to an Excel Workbook using the “Export All to Excel” button.

Schools Students Student Training Student Devices Grants Training Programs Devices Reports Users
